## TURF-MAKER LAWN FOOD

(formerly Gro-Sod)

### WHY SHOULD YOU SELL IT? HOW SHOULD YOU SELL IT?

Read these sales helps and

### INCREASE YOUR SALES

1. Although TURF-MAKER is higher priced than most fertilizers, it covers more than twice the area.
2. At this lower rate of application it feeds the lawn completely, supplying all the necessary plant food needed in good turf.
3. The formula is 10-6-4 and one-half the nitrogen is derived from organic sources. This means a longer feeding period as the organics break down in the soil slowly and become available to the grass over a period of time.
4. TURF-MAKER LAWN FOOD is for lawns only - - new plantings and for established turf. Lawns are grown principally for foliage, and nitrogen is the leaf growing element. The phosphorus and potash content is provided in that proportion needed by grass plants.
5. TURF-MAKER LAWN FOOD is a good investment for you and your trade. It provides a profitable "tie-in" sale and a satisfied customer.
